

# 3 Steps to a PBI

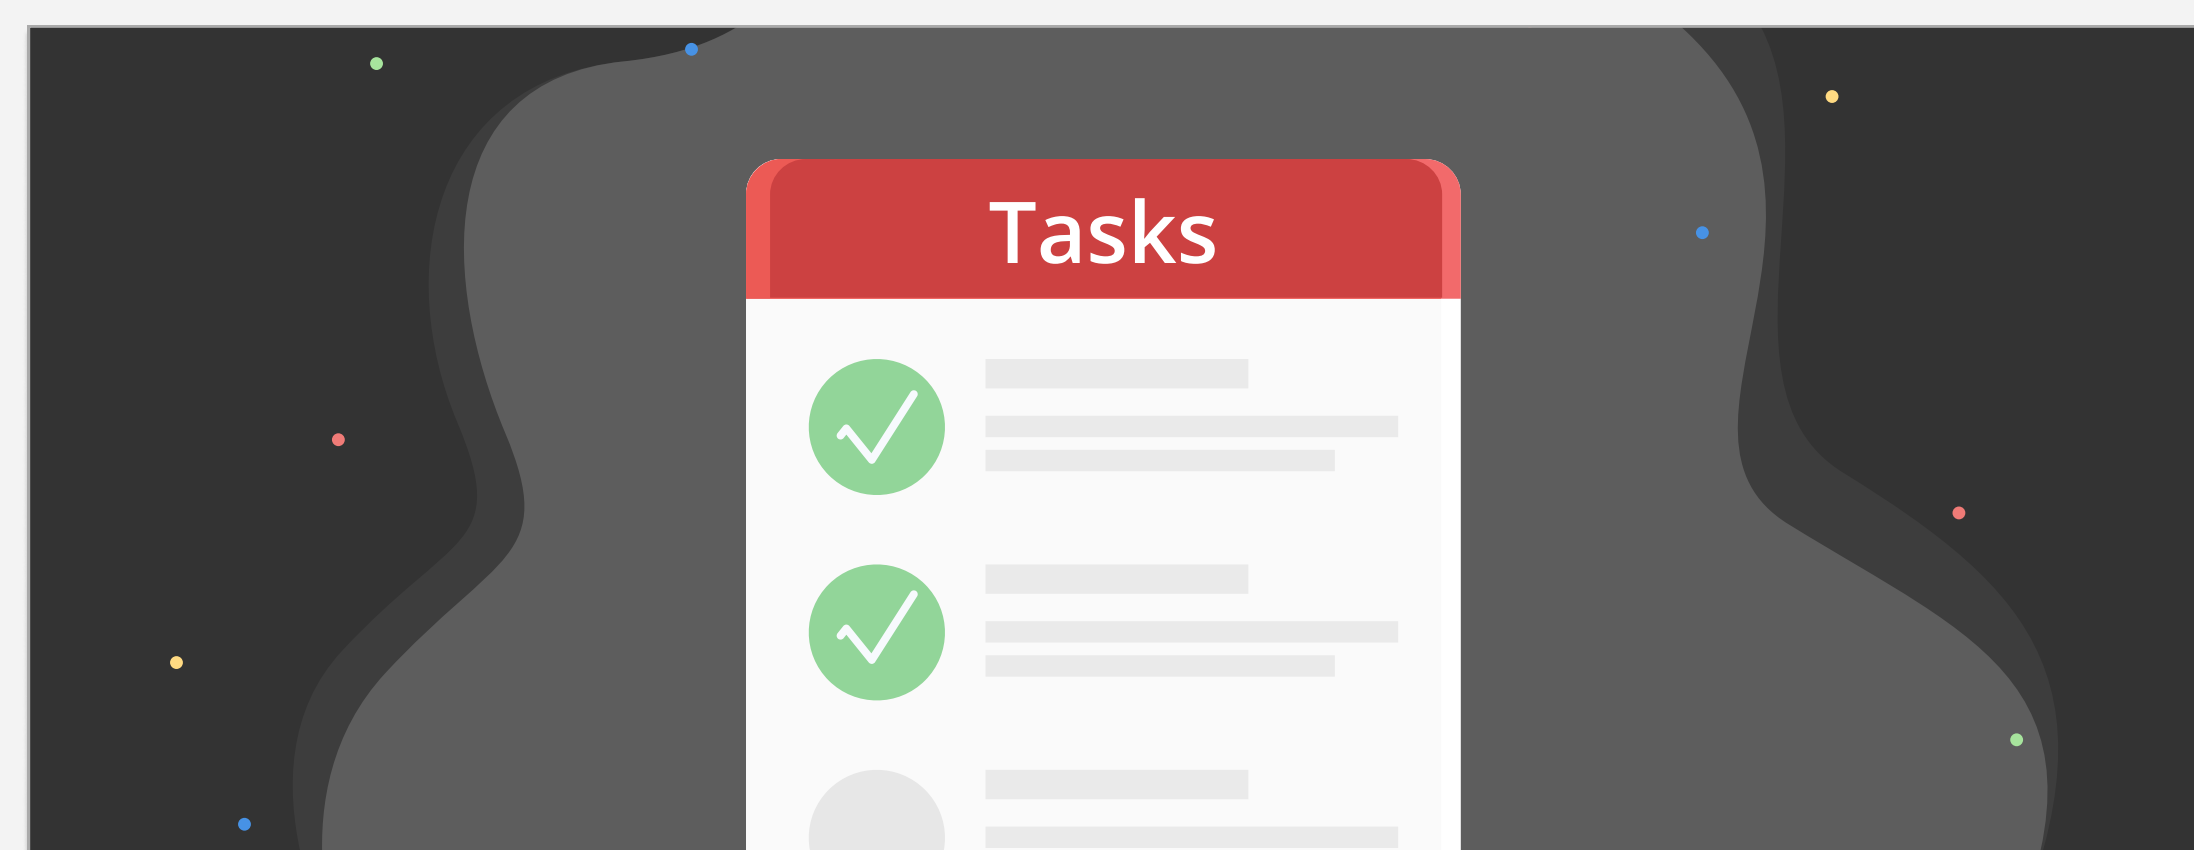

The important steps in a PBI lifecycle

## 1 Ready

- Choose PBI
- Double-check Definition of Ready

- Break the PBI into tasks (Optional)

## 2 Code

- Move PBI to "In Progress"
- Create a branch
- Code Code Code!  
Red - Green - Refactor
- Make a Pull Request
- Get an over-the-shoulder review

- Done Video  
Show Product Owner + Action feedback
- Merge Pull Request
- Check Definition of Done

## 3 Done

- Check code is deployed
- Reply "done" to PBI
- Close PBI
